

Johns Hopkins Onsite Clinic Impact: Delivering Faster Care, Lower ER Use and Proven ROI for an Academic Health System

Customer Snapshot

A large academic health system established an Onsite Clinic to deliver accessible episodic care, streamline referrals to appropriate providers, manage disease in-house and help employees become savvy health care consumers. The Johns Hopkins-managed Onsite Clinic operates across multiple locations within the health system and serves a workforce whose demographics align with those of a hospital setting, including a predominantly female population.

Customer Objectives

1

Reduce barriers to timely care for employees

2

Lower unnecessary emergency room utilization

3

Minimize time away from work for medical issues

4

Achieve a positive return on investment

Financial Impact

✓ **2.35 ROI**
(Historical range 1.6–3.1)

✓ **\$1.1M**
Avoided costs

Workforce Productivity

✓ **68%**
Immediate return to work

✓ **48%**
Time off cases limited to one day

Care Optimization

✓ **21%**
Reduction in Emergency Room (ER) utilization

Care That Works for Employees – and Employers

The Johns Hopkins Onsite Clinic provides same-day episodic care, triage and referral to specialty care, case management and education on navigating the health care system. The model emphasizes:

- ✓ Rapid onsite access to **avoid urgent care/ERs** when appropriate
- ✓ Efficient referral to the **right care for complex cases**
- ✓ Helping employees **establish and maintain high-quality PCP/specialist** relationships
- ✓ Coordination that **keeps employees safely at work or returns them to work sooner**

Key Results

Work status outcomes:

68%

of patients returned to work immediately with no restrictions, minimizing productivity loss

Only 13%

of patients were put off duty following Hospital Epidemiology Infection Control (HEIC) and Occupational Health guidelines

48%

of patients with time off were limited to a single full day, demonstrating conservative and targeted leave decisions

Financial impact:

\$1.1M

FY savings in avoided costs:

- o **\$370K**
avoided external outpatient claims
- o **\$389K**
productivity savings from time away for care
- o **\$322K**
productivity savings from quicker return to work

Emergency room utilization impact:

28%

reduction in ER visits for those with access to the onsite clinic compared to a control group

21%

reduction in ER visits among frequent clinic utilizers

Value of the Johns Hopkins Onsite Clinic and associated Care Navigation:

- Significantly **reduced time** to obtain medical care
- Employees reported becoming **more knowledgeable health care consumers**
- **Expedited referrals** for complex cases
- **Case management** helped employees establish and maintain relationships with excellent primary and specialty providers

Outcomes

The Johns Hopkins Onsite Clinic met all objectives: it provided fast, accessible care; efficiently triaged complex cases to appropriate resources; and helped employees build and sustain high-quality primary and specialty care relationships – empowering them to become more informed health care consumers.

Lower operating costs and reduced time to care have produced a consistently positive return on investment.

About Johns Hopkins Onsite Clinics

Johns Hopkins Onsite Clinics deliver customized primary, preventive, chronic and occupational care at the workplace – backed by Johns Hopkins Medicine’s excellence – to improve outcomes, lower costs and elevate the employee experience.
