Hospital Activity and Mobility Promotion (AMP) Workshop **April 5-6, 2018, Baltimore, MD**

The Johns Hopkins Medicine Workshop for Hospital Activity and Mobility Promotion (AMP) firmly establishes the concept that a systematic approach is beneficial in combatting immobility in the hospital. Join us to learn the Johns Hopkins approach to promote a culture of activity and mobility. This course provides the necessary support, tools, and guidance needed to design and implement a hospital based mobility initiative including:

- The Evidence and Environment to Support Mobility in the Hospital
- Hospital Functional Outcome Measures (AM-PAC and JH-HLM)
- Leveraging the Electronic Medical Record to Support Measurement of Function
- Implementing and Evaluating a Mobility Initiative
- Strategies and Tools for Staff Engagement and Education
- Methods to Engage Patients
- Tenets of Quality Improvement

ICU Rehabilitation E-learning Modules

Our e-learning modules are recordings of selected live sessions from the Third and Fourth Annual Johns Hopkins Critical Care Rehabilitation Conferences. These modules provide foundational content for developing and maintaining an ICU Rehabilitation program. E-learning modules include:

- Evaluating Patients with Critical Illness: An Introduction for Rehabilitation Professionals (duration: 3.25 hours; \$135)
- The Basics of Creating and Sustaining an Early Rehabilitation Program (duration: 3.5 hours; \$135)
- Advanced Topics in Early Rehabilitation of Critically Ill Patients (duration: 5.5 hours; \$175)

For more detailed information, including example videos from each module, visit our course catalogue at bit.ly/icurehab
